

snapshot payments

Digital payments are a game-changing solution because no one wants to wait for money.

Payments are a pain point in claims. It's a common misalignment in expectations in claims. The adjuster issues payment to close the claim and from the adjuster's perspective, the claim is closed. But the customer or vendor is still waiting — and waiting — for their check to arrive in the mail. What if you could issue payments within hours instead days? Or better yet, what if your system issued payments automatically...

Benefits of Snapshot's Payments

- Digital payment means claims close faster
- Customers that have received payments don't call, email, or leave voicemails for adjusters to manage
- Customers who receive their payment quickly are less likely to complain about their payments
- Employees don't waste time cutting checks
- Electronic funds transfer is cheaper than paper checks

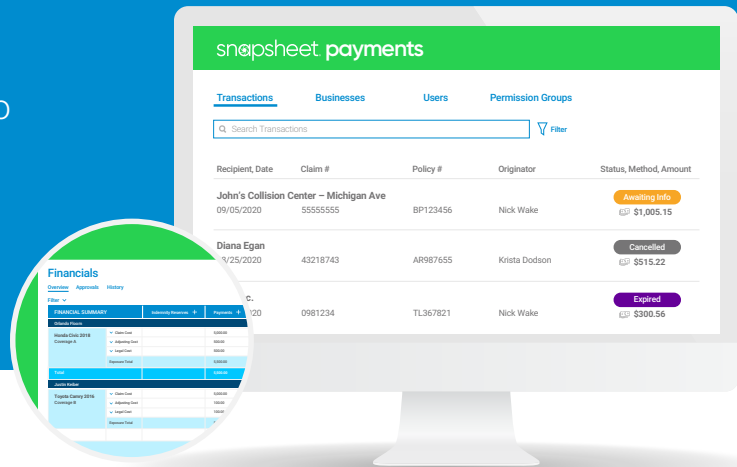

Deliver better customer experiences through faster Snapshot Payments

- Vendor portal for payment self-management
- White-labeled payee communication and payment portal
- PDF attachment with payment notification
- Responsive design, mobile-enabled

Claims Operations

- Claims-specific automated workflows
- Multi-party workflows
- Multiple payment methods in one workflow
- Digital form generation supporting direction of pay workflow with e-sign
- Payment creation via web-portal, API, and bulk file transfer
- Multiple company and program white-labeling

Treasury/FinOps

- Out-of-box bank integration
- Streamlined reconciliation via financial system integration
- Digital reporting at bulk and line item level
- 1099 data reporting
- Real-time status transparency and payment analytics
- Vendor W9 and IRS verification services
- Check stop-payment & images capability

With Snapshot Payments, we have been able to pay claimants faster through digital payments. We have seen claimants provide their payment information shortly after the payment email was sent which allowed the funds to be posted the next business day. This resulted in greater claimant satisfaction and operational benefits.”

Jeff Obermeyer
Director of Strategic Initiatives

Deliver a better customer experience through faster payments and increased digital adoption over paper checks through the Snapshot Payments platform.
